

QG input module for datalogger MS

code: M1040

Thermocouple B (Pt30%Rh-Pt) input. Measuring range +100 to +1800°C.
Accuracy $\pm 0.3\%$ from reading + 1.0°C from +300 to +1800°C.
Linearized, without cold junction compensation. Galvanically isolated.
Galvanic isolation is not designed as safety protection.
