

Temperature, humidity and pressure data logger with built-in sensors

code: U4130

Datalogger is designed to record temperature, humidity and atmospheric pressure.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via USB-C.

In case of exceeded set limits alarms are indicated by LED, LCD and acoustically by built-in beeper.

Recorder **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.
