

WebSensor - remote CO2 concentration with Ethernet interface

code: T5541

CO2 - carbon dioxide t-line Web sensor. Remote alarm.

Web Sensor with CO₂ probe on the cable.

A multiple point CO_2 and temperature adjustment procedure leads to excellent CO_2 measurement accuracy over the entire temperature working range; this is a must for process control and outdoor applications. The dual wavelength NDIR CO_2 sensing procedure compensates automatically for ageing effects. The CO_2 module is highly resistant to pollution and offers maintenance free operation and outstanding long term stability.

The device is supplied with CO2 probe with 1m cable. Cable lengths 2 or 4 meters available optionally.

The CO2 concentration is shown on the display or signaled by a color LED.

Processing and analysis of measured data:

- online in **COMET Cloud**
- **COMET Database** software
- integration into 3-party systems

With a newly purchased WebSensor with Ethernet communication, you receive 3 months of <u>COMET Cloud</u>. for free; a full year of operation in <u>COMET Cloud</u>. then requires <u>1 credit</u>.
