WebSensor with PoE - remote CO2 concentration with Ethernet interface

code: T5641

CO2 - carbon dioxide t-line Web sensor. Remote alarm.
CO2 Web Sensor with PoE function.

A multiple point CO_2 and temperature adjustment procedure leads to excellent CO_2 measurement accuracy over the entire temperature working range; this is a must for process control and outdoor applications. The dual wavelength NDIR CO_2 sensing procedure compensates automatically for ageing effects. The CO2 module is highly resistant to pollution and offers maintenance free operation and outstanding long term stability.

The CO2 concentration is shown on the display or signaled by a color LED.

The device is supplied with CO2 probe with 1m cable. Cable lengths 2 or 4 meters available optionally.

Processing and analysis of measured data:

- online in COMET Cloud
- COMET Database software
- integration into 3-party systems
