

# IoT wireless thermometer, hygrometer for external probe, LoRaWAN network

code: W3911

The W3911 sensor with LoRaWAN network output measures the temperature and humidity from an external probe on the cable and can be installed directly in the measured environment thanks to its IP65-rated enclosure. LoRa devices are powered by a replaceable battery with a lifespan of up to 10 years (3 years standard). External power with optional accessories is also available. The sensor can be used with a suitable sensor cap even in more demanding conditions.

Measured values are transmitted wirelessly at adjustable intervals (from 5 minutes to 24 hours) to the COMET Cloud storage, where they are accessible to users via computer or mobile device. The sensors offer remote configuration from the COMET Cloud and feature the capability to monitor up to two alarm thresholds, with any exceedance signaled by an alert sent to the user.

## Key Features

- Wireless transmission of measured values and alarm states
- Battery-powered with low battery indicator (battery life up to 10 years) and external power option
- Remote device configuration via COMET Cloud
- IP65-rated enclosure
- Calibration certificate with declared metrological traceability of standards according to CSN EN ISO/IEC 17025
- Preconfigured Gateway available as an accessory at extra cost. For ease of use, we offer the pre-configured [LoRaWAN Gateway SP041](#), which is fully ready for communication with COMET Cloud and our sensors. This option simplifies the setup process and saves time for users

## Technical data

|   |   |
|---|---|
| TEMPERATURE SENSOR  |   |
| Measuring range   | according to the connected probe Digi/E |
| Accuracy  | according to the connected probe Digi/E |
| Resolution  | 0.1 °C                                  |
| Response time t90 of temperature measurement (temperature step 20°C, air flow approximately 1m/s) | according to the connected probe Digi/E |
| HUMIDITY SENSOR   |   |
| Measuring range   | according to the connected probe Digi/E |
| Accuracy  | according to the connected probe Digi/E |
| Resolution  | 0.1% RH                                 |
| DEW POINT   |   |
| Measuring range   | according to the connected probe Digi/E |
| Accuracy  | according to the connected probe Digi/E |
| Resolution  | according to the connected probe Digi/E |
| GENERAL TECHNICAL DATA  |   |

|                               |   |
|-------------------------------|---|
| Operating temperature         | -30 to +60 °C   |
| Channels                      | 1x connectable temperature+humidity probe                 |
| Message transmission interval | adjustable 5-10-15-20-30 minutes, 1-2-3-4-6-8-12-24 hours |
| Operating frequency           | Europe 863-870 MHz  |
| Maximum transmission power    | 25 mW (14 dBm)  |
| Typical range of transmitter  | 15 km in the field, 2 km in the city (sensor in building) |
| Antenna                       | internal, gain 2,15 dBi                                   |
| Maximum receiver sensitivity  | -136 dBm @BW=125 kHz, SF=12                               |
| Power                         | Lithium battery 3.6 V, AA size                            |
| Protection class              | IP65  |
| Dimensions                    | 126 x 89 x 40mm   |
| Weight (including batteries)  | 150g  |
| Warranty                      | 3 years   |
